

DID YOU KNOW?

- **GMO's Four GM crops account for 99% of worldwide GM crop hectarage. These are soy (50%), maize (30%), cotton (14%), and canola (5%).**
- **A GMO is not a single type of crop nor is it a crop variety – it is a technique (or tool) that can be used in many different ways. So unfortunately you eating GMOs unknowingly.**

 **Mvangati Street, Lot 540
Checkers, Mbabane**
